The Company

The Company

ABOUT US :

PETRO ENGINEERING was established following years of experience and skills by its founders .

Our registered company name, is as shown in the attached formal documents , was inspired by Euclid, the 'Father of Geometry'. Euclid established the basics of engineering and was a prominent Greek mathematician. Furthermore, our commercial company name Petro Engineering was named after Petro's family name which traced back to Greece.

PETRO ENGINEERING is proud to provide complete service through our professional and knowledgeable staff and consultants .

Our motto is :

" We make buildings work "

Which we believe we can do so .

PETRO ENGINEERING offers a broad range of engineering services and applies new standards of excellence by providing superior commissioning management services upon completing the installation of the systems .

We offer the following services:

- MEP Contractor
- Fit-out Contractor
- Testing And Commissioning
- Facility Management
- Maintenance

Testing and Commissioning

Facility Management

Maintenance

MEP Contractor

MEP Contractor

Electromechanical works are an integral part of any interior works. Performance of key building services like HVAC, water lines, electrical works, depending on the quality of the MEP design adopted. Such professional MEP design needs to be adopted in its full capabilities to deliver a successful implementation of the project.

Another important aspect is the HVAC design for the premises we undertake. We work with HVAC specialists, who do a detailed study on the design data provided. And further, provide a comprehensive HVAC solution for the project.

Fitout Contractor

Fitout Contractor

Fit out services are a detailed multi-step process that needs to be carried out professionally to complete the project on time. Additionally, all as to happen on budgeted cost and with the highest build standards. A transparent and proven process is necessary for the client and all parties involved to make this happen perfectly. We maintain highest level of transparency and quality process.

Another important aspect is the coordinating and implementation of the following services :

- Interior Design
- Landscape
- Renovations
- Value Engineering

Which conclude a full integrated services that lead to a timely and safely completion.

Maintenance

We can provide any needed maintenance whether it's related to paint, ceilings, AC, electrical, plumbing, masonry, etc.

Maintenance

Testing and Commissioning

Testing and Commissioning

Testing and Commissioning of buildings systems following international standards (i.e. SMACNA, ASHRAE, NEBB, AABB , etc.) .

- Testing Adjusting and balancing of air side of HVAC systems
- Testing Adjusting and balance of hydronic side of HVAC systems
- Sound and vibration measurements
- Testing and commissioning of various building systems (i.e. Electrical system low current systems, domestic water systems, firefighting systems , BMS , etc.)

HVAC Contractor

HVAC Contractor

In addition we do the installation of new systems, maintenance and modification of existing Heating, Ventilating, and Air Conditioning system (HVAC) . And other relevant services such as :
